The Master's in Transpersonal Psychology

The Master's in Transpersonal Psychology Degree program is offered to students whose focus is on learning as well as practice. This program is especially geared towards professionals in the healing arts. Transpersonal Psychology integrates both psychology and spirituality, an interdisciplinary approach. In addition, the field draws from philosophy, art, anthropology, history, and healing.

Transpersonal Psychology is a branch of psychology that is concerned with the study of those states and processes in which people experience a deeper or wider sense of who they are, or a sense of greater connectedness with others, nature, or the "spiritual" dimension. It is about the seen and the unseen, the conscious and the unconscious beliefs that guide people's everyday motivations, and behaviors. Transpersonal Psychology is the study of the "whole" human being, mind, body, and spirit, combining insight from both Eastern and Western thinking.
